

Conflict Minerals Policy

Conflict minerals are minerals mined in conditions of armed conflict and human rights abuses, notably in the Democratic Republic of the Congo, such as Tantalum (Ta), Tin (Sn), Gold (Au), Tungsten (W), by armed parties who are often affiliated with various armed rebel groups. The profits from the sale of these minerals finance continued fighting in Second Congo War, and control of lucrative mines becomes a focus of the fighting as well.

As a citizen of the world, Chaun-Choung Technology Corp. (hereinafter referred to as CCI) respects for international human rights and makes contributions to corporate social responsibility; We declare and commit to refusing the application of metals from fighting region. We will keep paying attention to this issue, and do due diligence to ensure that CCI and CCI's supply chain avoid using conflict minerals.
